

PSR™ Peterson Screw-Retained

Full Arch Zirconia SOLUTION

The PSR Crystal Hybrid is a reliable solution for the fully edentulous patient. Constructed of 100% Crystal Solid zirconia, this fully edentulous restoration provides resistance to chips, fractures and staining with improved function and esthetics.

PSR™ Crystal Hybrid Advantages

- No acrylic teeth to wear down
- Strong esthetic restoration with no odor absorption
- Hygienically designed appliance
- Affordable ceramic full arch restoration
- Predictable implant lab fees and no hidden cost

PSR™ Crystal Hybrid Indications

- Full arch implant supported prosthesis when connecting 4 or more implants
- Screw-Retained Bridges
- Patient with ridge absorption
- Predictable implant lab fees and no hidden cost
