

Screw-Retained **ASC** Crowns

Our most popular implant solution for patients who desire strength and esthetics at an affordable price.

Maximum Mobility

ASC (Angulated Screw Channel) allows for screw access holes to be re-angulated 25° and gives 360° of rotational freedom.

Ensured Stability

SelectGrip Surface Treatment improves retention by 500%

Minimal Cost

Utilizing a stock Tibase makes this restoration attainable for every patient, without having to sacrifice strength or esthetics.

Ultimate Trust

Every component is FDA Compliant and comes with a Lifetime Warranty.*

Screw-Retained **ASC** Crowns

Every ASC Crown now includes **periocoat**,[®] a surface treatment that ensures less inflammation and plaque adhesion. **Periocoat**[®] is 6x harder than Titanium Oxide, and won't scratch as easily during cleaning.

FEATURE	BENEFIT	ADVANTAGE
Screw Access Hole	<ul style="list-style-type: none">Easily RetrievedNo Excess Cement	Remove without damage and reduce perimplantitis
ASC "Angulated Screw Channel"	<ul style="list-style-type: none">Re-angulate screw access hole up to 25°360° rotational freedom	Increased Mobility = Improved Aesthetics and Strength
